Vancott and Beulah Vancott, is engaged in the business of distributing electrical supplies, and is a warehouse as defined in General Preference Order M-9-a. From February 9 to September 21, 1942, the Company sold and delivered substantial quantities of copper wire and other wire or brass mill products to fill orders bearing no preference ratings. From May 9 to September 14, 1942, the Company sold and delivered substantial quantities of copper wire and other wire or brass mill products to fill orders bearing preference ratings lower than A-1-k. During this time the Company was familiar with the restrictions contained in General Preference Order M-9-a as amended February 6, 1942, and May 7, 1942, and the foregoing deliveries constituted wilful violations of that order.

From January 19 to June 17, 1942, the Company applied preference ratings of A-10 under Preference Rating Order P-100 to purchase orders for various materials, certifying that such materials were for maintenance, repair, or operating supplies. These materials were not used or intended to be used by the Company for maintenance, repair, or operating supplies and the Company had not received rated orders from its customers to support its application of these ratings. Therefore, its use of the A-10 preference rating constituted wilful violations of Preference Rating Order P-100 and misrepresentations to the War Production Board.

These violations of General Preference Order M-9-a and Preference Rating Order P-100 have hampered and impeded the war effort of the United States by diverting scarce materials to uses unauthorized by the War Production Board. In view of the foregoing, *It is hereby ordered, That:*

§ 1010.191 Suspension Order S-191.

(a) Deliveries of material to B. R. Vancott, and Beulah Vancott individually or doing business as National Wholesale Electric Company or otherwise, shall not be accorded priority over deliveries under any other contract or order and no preference ratings shall be assigned or applied to such deliveries to B. R. Vancott and Beulah Vancott, individually or doing business as National Wholesale Electric Company or otherwise, by means of preference rating certificates, preference rating orders, general preference

orders, or any other orders or regulations of the Director of Industry Operations or the Director General for Operations, except as specifically authorized by the Director General for Operations.

(b) No allocation shall be made to B. R. Vancott, and Beulah Vancott, individually or doing business as National Wholesale Electric Company or otherwise, of any material the supply or distribution of which is governed by any order of the Director of Industry Operations or the Director General for Operations, except as specifically authorized by the Director General for Operations.

(c) Nothing contained in this order shall be deemed to relieve B. R. Vancott, and Beulah Vancott, individually or doing business as National Wholesale Electric Company or otherwise, from any restriction, prohibition, or provision contained in any other order or regulation of the Director of Industry Operations or the Director General for Operations, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on January 2, 1943, and shall expire on April 2, 1943, at which time the restrictions contained in this order shall be of no further effect.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Regulation 1 as Amended Dec. 29, 1942]

Part 944, Priorities Regulation No. 1, is hereby amended in the following respect:

Section 944.11 is amended to read as follows:

§ 944.11 *Use of material obtained under allocation or preference rating.* Any person who obtains a delivery of any material with priorities assistance or pursuant to an order of the Director General for Operations must use such material, or an equivalent amount thereof, for the purpose for which it was obtained. If it cannot be used for such purpose, either because of the revocation of an applicable preference rating or for any other reason, such person shall use or dispose of the material, or any item into which it has been incorporated, only as follows:

(1) To fill, in accordance with this regulation, rated contracts or purchase orders placed with him and bearing a rating of AA-5 or higher, or a rating at least as high as that upon which the material was obtained if it was obtained with a rating lower than AA-5, provided

such use is permissible under Priorities Regulation No. 13 and any other regulations or orders controlling the production or distribution of the particular material or item; or

(2) For his own needs, if he has been duly authorized to obtain material for such use by applying or extending a preference rating of AA-5 or higher, and such use is permissible under applicable regulations and orders; or

(3) By redelivering the material to the person who originally delivered it to him.

If and to the extent that such person is not able to use or dispose of such materials or items as permitted above, he may file with the regional office of the War Production Board for the region in which the materials or items are located a report describing the same, so that they can be redistributed.

PART 962—IRON AND STEEL

[General Preference Order M-21 as Amended Dec. 29, 1942]

Whereas the national defense requirements have created a shortage of steel, as hereinafter defined, for defense, for private account, and for export and it is necessary, in the public interest and to promote the defense of the United States, to conserve the supply and direct the distribution thereof;

Now, therefore, it is hereby ordered, That:

§ 962.1 *General Preference Order M-21—(a) Applicability of Priorities Regulation No. 1.* This order and all transactions affected thereby are subject to the provisions of Priorities Regulation No. 1 as amended from time to time, except to the extent that any provision thereof may be inconsistent herewith, in which case the provisions of this order shall govern.

(3) Except for orders in group classifications, lend-lease, other export, and warehouse, on orders placed on or before May 31, 1942, with deliveries to be made after that date, a purchaser's statement in the above form must be filed with the producer on or before May 31, 1942, together with a description of the purchase orders to which each such statement applies.

(4) On export sales (except lend-lease sales and sales to purchasers in the Dominion of Canada) the purchaser's statement may be furnished by the accredited agent of the purchaser or by the export division of the producer.

(5) On shipments by a producer direct to the customer of a warehouse the purchaser's statement shall be furnished to the producer by the customer and not by the warehouse.

(d) *Producers' reports.* Each producer shall file with the War Production Board, Washington, D. C., Reference: M-21, reports at such times and on such forms as may from time to time be prescribed.

(f) *Specific directions.* The Director General for Operations may from time to time issue specific directions to any person or persons as to the type, description, amount, source, or destination of steel or iron products to be produced, delivered, or acquired by such person or persons.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Law 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

PART 937—PRODUCTION AND DELIVERY OF MACHINE TOOLS

[General Preference Order E-1-b as Amended Dec. 23, 1942]

§ 937.2 *General Preference Order E-1-b—(a) Definitions.* (1) "Machine tools" include the products listed in schedule hereto attached and marked Exhibit A¹ and divided into two groups designated Group I and Group II for the purpose of this order as hereinafter specified. The term "tool" means a machine tool. Each machine tool includes not only the basic machine but also all fixtures, equipment and tooling covered by the original purchase order which are required to be delivered with the tool to make it usable in production for the purposes intended, but does not include any replacements, or spare parts or equipment, or extra tooling, ordered by the purchaser.

(2) "Producer" means any individual, partnership, association, corporation, or other form of enterprise engaged in producing any products listed in Exhibit A.

(3) "Service purchasers" means those whose preference rating certificates, or whose endorsed purchase orders, show that the preference rating applied to such delivery was assigned thereto by an original Preference Rating Certificate PD-3, PD-3A, or PD-4, or by Preference Rating Order P-19-h, calling for delivery to a supply arm or bureau of the Army or Navy, or to the United States Maritime Commission, or to one of their prime contractors, or to a subcontractor of such a prime contractor.

(4) "Foreign purchasers" means those whose purchase orders show that the tool is to be delivered to or for the account of a foreign country (other than Canada), or a subdivision, agency, or instrumentality thereof: *Provided*, That such purchase orders have been placed by the Ordnance Department (Army) or by the Procurement Division of the Treasury Department, with or without a preference rating certificate; or, in the case of purchase orders placed prior to May 1, 1942 by a purchasing or procurement agent of a foreign country, where such purchase orders have been scheduled pursuant to a preference rating certificate, a Special Allocation Order No. 1, or General Preference Order No. E-3.

(5) "Other purchasers" means all purchasers other than service purchasers and foreign purchasers, to whose purchase orders a preference rating has been assigned, including Canadian.

(6) "Class" when used herein means one of the foregoing three classes of purchasers: namely, service purchasers, foreign purchasers, or other purchasers.

(7) "Size" as used herein may include all of those dimensions or variations of a particular type of tool which can be used interchangeably for production purposes.

(b) *Revocation of previous order.* General Preference Order No. E-1-a Revised, including the Numerical Master Preference List, Revision No. 1, is revoked as of May 1, 1942 as to machine tools, and shall thereafter be of no further force or effect with respect to machine

¹ Not filed as part of the original document.

tools except as present schedules and urgency standings are continued by paragraph (c) of this order. Makers of gages and chucks will continue to schedule their production according to General Preference Order No. E-1-a, Revised, until further order of the Director General for Operations.

(c) *Production and delivery of machine tools during November 1942 and until further notice.* Notwithstanding any other provisions of this order, each producer shall schedule 75 percent of his production and delivery of each size of each type of machine tool during the balance of the calendar month of November 1942 and each month thereafter as follows, until further notice:

(1) Each producer forthwith shall divide into two types all purchase orders placed by each of the seven groups of Service purchasers (Bureau of Ships, Bureau of Ordnance, Ordnance Department, Air Services, Miscellaneous Bureaus and Branches, Maritime Commission, and Signal Corps) which specify as the required delivery date the month being scheduled or a previous month, such types being designated as Type 1 orders and Type 2 orders. The "required delivery date" is the date specified on the endorsement accompanying the purchase order, as changed by any subsequent instruction given on Form WPB-27, Form WPB-1588, or otherwise, by the War Production Board, or by any postponement thereof by the purchaser.

Type 1 orders shall include the following:

(i) Any purchase order for delivery to any Service Purchaser in the "Air Services" group (called "Air Forces" in Exhibits A and B to General Preference Order E-1-b). "Air Services" includes the Army Air Forces, the Navy Bureau of Aeronautics, their respective prime contractors and subcontractors, and the U. S. Corps of Engineers with respect to purchases made for the account of the Army Air Forces; and in addition thereto,

(ii) Any purchase order for delivery to any prime contractor listed on the preferred customers list (Exhibit C attached to this order) or any subcontractor of such a prime contractor. No purchase order from a prime contractor on the preferred customers list, or from his subcontractors, shall be classed as a Type 1 order, however, unless the endorsement required by paragraph (h) of this order to be placed by such purchaser on his purchase order, or the preference rating certificate itself if transferred to the producer, shows that the machine tool ordered is for use on the prime contract specified opposite the prime contractor's name on such Preferred Customers List.

Type 2 orders shall include all other purchase orders placed by Service purchasers which do not fall in Type 1 orders.

(2) The producer shall total all Type 1 orders from Service purchasers for the size and type of tool being scheduled, which specify as the required delivery date the month being scheduled or a previous month. Where 75 percent of the production of the size and type of tool being scheduled for delivery in any month is greater than the total Type 1

orders received from all Service purchaser groups specifying that month or a previous month as the required delivery date, all such Type 1 orders shall be scheduled for delivery in that month regardless of the effect on any Type 2 orders. The residue of such 75 percent shall be scheduled for delivery against Type 2 orders from the remaining Service purchaser groups in accordance with the percentage quotas established by Exhibit A to this order, the "Air Services" quota becoming an unabsorbed quota distributable in accordance with paragraph (e) (5) of this order.

(3) Where 75 percent of the production of the size and type of tool being scheduled for delivery in any month is less than the total Type 1 orders received from all Service purchaser groups specifying that month or a previous month as the required delivery date, no Type 2 orders shall be scheduled for delivery in that month. Where the Type 1 orders in such case are from more than one Service purchaser group, the distribution of such 75 percent of production between the Type 1 orders from such groups shall be determined as follows: The percentage which 75 percent of the production for that month constitutes of the total Type 1 orders from all such Service purchaser groups shall be determined. Such percentage shall then be applied to the number of such Type 1 orders from each Service purchaser group involved, and the resultant number of Type 1 orders shall accordingly be scheduled for delivery to such group. The particular Type 1 orders to be scheduled for each such Service purchaser group and the sequence of their delivery shall be determined by the Numerical Master Preference List, as amended by Revision No. 4 and corrections and additions thereto, the operation of which is set forth in paragraph (i) of this order.

(4) 25 percent of each producer's production for each month of each size of each type of tool shall continue to be scheduled for delivery to foreign purchasers and other purchasers in accordance with the other provisions of this order.

(5) Immediately upon scheduling machines for delivery in accordance with paragraphs (c) (2), (c) (3), and (c) (4) of this order, each producer shall notify all purchasers of the new scheduled delivery dates which fall within the period ending February 28, 1943.

(6) Notwithstanding the provisions of this paragraph (c), the War Production Board from time to time may issue specific scheduling instructions to any producer.

(7) The four months rule established by paragraphs (d) (4) and (e) (5) of this order, and the thirty and sixty day "frozen" periods established by paragraph (i) of this order, shall not be applied to Type 1 orders. All Type 1 orders on hand on November 5, 1942 or received in the future shall immediately be scheduled for delivery on their required delivery dates or as soon thereafter as possible without retarding production. All Type 2 orders remain subject to the terms of this General Preference Order E-1-b except as the

delivery dates on such orders may be extended by the rescheduling of Type 1 orders in accordance with this paragraph (c).

(8) All other provisions of this General Preference Order E-1-b not modified by this paragraph (c) shall remain in full force and effect.

(d) *Allocation of production to service purchasers and to foreign and other purchasers.* (1) Except as provided in subparagraphs (3) and (4) of this paragraph, each producer shall schedule his production for each calendar month so as to deliver 75 per cent of his production of each size of each type of tool which he produces in that month to service purchasers.

(2) Except as provided in subparagraphs (3) and (4) of this paragraph, each producer shall schedule his production for each month so as to deliver 25 per cent of his production of each size of each type of tool in the aggregate to foreign purchasers and other purchasers.

(3) A producer may schedule for delivery to service purchasers more than 75 per cent of his production of any size of a type of tool in a given month, to the extent that he has failed to receive purchase orders for foreign purchasers and rated purchase orders from other purchasers for tools of such size and type prior to the first day of the fourth month preceding the month of delivery.

(4) A producer may likewise schedule for delivery to foreign purchasers and other purchasers more than 25 per cent of such production of any size of a type of tool in a given month, to the extent that he has failed to receive rated purchase orders from service purchasers for tools of such size and type, prior to the first day of the fourth month preceding the month of delivery.

(5) In preparing his schedules as aforesaid, a producer shall fix the dates of his deliveries of tools to service purchasers, to foreign purchasers and to other purchasers within a given month so that each class will receive its percentage of tools equitably in point of time within the month.

(e) *Distribution of 75 per cent of production among Service purchasers.* (1) Service purchasers are hereby subdivided into seven groups consisting of the following, and their respective prime contractors and subcontractors: Bureau of Ships (Navy), Bureau of Ordnance (Navy), Ordnance Department (Army), Air Services, Miscellaneous Branches and Bureaus, the Maritime Commission, and the Signal Corps. The fourth group, designated "Air Services," includes the Army Air Forces and the Navy Bureau of Aeronautics and their respective prime contractors and subcontractors. The fifth group, designated "Miscellaneous Branches and Bureaus," includes the Quartermaster Corps, the Corps of Engineers, the Army Medical Department, the Chemical Warfare Service, the Bureau of Yards and Docks, the Marine Corps, and the Transportation Service of the Services of Supply, together with any other corps, department, bureau or service of the Army and Navy not heretofore specifically designated as a separate

group, and their respective prime contractors and subcontractors.

(2) Exhibit A specifies a percentage of each type of tool which is to be delivered each month to each different group of service purchasers. The aggregate of such percentages is 75 per cent.

(3) The stated percentage for each group where applied to a producer's production of each size of a given type of tool in a specified month, establishes the "quota" for that group of that size and type during that month.

(4) During each calendar month, each producer shall deliver to each group of service purchasers the number of tools of each size of a given type which equals the quota of the group for that size and type.

(5) If a producer does not have on hand on the first day of the fourth month preceding the month of delivery, rated purchase orders from the Bureau of Ships (Navy) group equal to that group's quota of a size of a given type of tool for that month, the producer shall schedule purchase orders received from the Bureau of Ordnance (Navy) group for the balance of the Bureau of Ships (Navy) group quota of that size and type for delivery during that month. Similarly, if the producer does not have orders on hand from the Bureau of Ordnance (Navy) group equal to its quota, he shall schedule purchase orders received from the Bureau of Ships (Navy) group for the balance of the Bureau of Ordnance (Navy) group's quota.

If a producer does not have on hand on the first day of the fourth month preceding the month of delivery, rated purchase orders from the Bureau of Ships group plus the Bureau of Ordnance group equal to their combined quotas of a size of a given type of tool for that month, or if he does not have on hand on such date rated purchase orders from any other single group of service purchasers equal to that group's quota of a size of a given type of tool for that month, the producer shall schedule purchase orders received from members of other groups of service purchasers for that size and type for delivery during that month. Where members of two or more other groups have placed purchase orders aggregating more than such unordered balance of the combined quotas of the Bureau of Ships and Bureau of Ordnance, or of any other single group's quota, the producer must first schedule the purchase orders of those purchasers who are members of the group having the greatest ratio of:

(i) Unfilled purchase orders, specifying required delivery dates in said month of delivery and in preceding months, but not scheduled for delivery in said months to;

(ii) The number of tools to which said group is entitled under its quota,

until that ratio has been reduced to or below the ratio of another group or groups, after which the producer shall schedule the purchase orders of members of the group or groups which then have the greatest ratio, and shall continue to schedule in this manner until the unordered balance has been entirely distributed. Where several groups have the

same ratio, and there are not sufficient undistributed tools to schedule one for each group, preference shall be given to the groups having the lower percentage quotas.

(6) Likewise, if a producer does not have on hand on the first day of the fourth month preceding the month of delivery, rated purchase orders from foreign and other purchasers equal to 25 percent of his production of a size of a given type of tool for that month, the producer shall schedule purchase orders received from service purchasers for that type and size for delivery during that month, in the manner provided in paragraph (e) (5) hereof.

(7) A purchase order which has been scheduled as provided in subparagraphs (5) and (6) hereof shall represent an addition to the quota of the group of which the service purchaser in question is a member, and such purchase order shall not thereafter be affected by the receipt of a purchase order from a member of any other group, irrespective of the urgency standing of the latter.

(8) In preparing his schedules of deliveries for a given month for service purchasers, a producer shall fix the dates of his deliveries to the different groups so that each group will receive its percentage of tools equitably in point of time within the month.

(f) *Distribution of 25 per cent of machine tools among foreign and other purchasers.* Foreign purchasers and other purchasers shall be treated as one group, and each producer shall schedule his orders for each size of each type for delivery each month, within their aggregate 25 per cent of production for that month, in accordance with the sequence of deliveries determined as hereinafter specified in paragraph (i): *Provided, however,* That if the purchase orders from foreign purchasers and other purchasers with any producer with required delivery dates in any one month, aggregate more than 25 per cent of his production for any size of a given type during such month, such producer shall immediately file with the War Production Board a report stating the size and type of tool, showing all such purchase orders and designating for each order the required delivery date, the name of the purchaser, or the foreign country in the case of foreign purchasers, the purpose for which the tool is to be used in the case of other purchasers and the required delivery dates. The Director General for Operations, or such other official as may be specifically authorized by him, will thereupon examine such report and issue directions as to which purchase orders shall be eliminated in order to bring the aggregate within the 25 per cent allocation, or such other directions as he may deem necessary.

(g) *Treatment of fractions.* Where the number of tools which results from the use of a percentage to be applied under this order contains a fraction of more than one-half, the fraction shall be counted as a whole tool. A fraction under one-half shall be disregarded, except that where the computation results in a fraction only (less than one whole tool) for any one month, and such frac-

tion is less than one-half it shall be counted in computing the next month's quota. Where each of the computations of two or more different quotas for the same month shows a fraction of one-half, and there is only one remaining tool to which such fractions can apply, such tool shall be allotted to the group having the highest percentage quota, and the other fractions of one-half shall be disregarded for that month, but shall be counted in computing the other quota or quotas for the next month.

(h) *Necessity for preference ratings.*

(1) Except in the case of purchase orders of foreign purchasers, no purchase order for any machine tool shall be given priority standing in production schedules, and no machine tool shall be sold or delivered, unless a preference rating of A-10 or higher has been assigned thereto by a Preference Rating Certificate PD-1A, by a Preference Rating Certificate PD-3A, by a Preference Rating Certificate in the PD-403 series, or by a Preference Rating Order No. P-19-h.

In placing the endorsement required by Priorities Regulation No. 3 on the purchase order there must also be included therein or set forth in a separate endorsement on the purchase order:

(i) The urgency standing of the purchaser, if any;

(ii) The required delivery date of the tool;

(iii) A statement as to whether the purchaser is a "Service purchaser," a "foreign purchaser," or an "other purchaser," and

(iv) In the case of Service purchasers, the Supply Arm or Bureau of the Army or Navy, or the Maritime Commission, which placed the prime contract, the number of the prime contract, and the name of the prime contractor;

(v) In the case of foreign purchasers, the foreign country for which the tool is purchased; and

(vi) In the case of other purchasers, a statement as to the product or production program for which the tool is to be used.

In addition to making the endorsement upon his purchase order as required, any person placing such an order after December 25, 1942 shall furnish to the producer a photostatic copy (or another copy accompanied by his sworn statement that it is a true copy) of the Preference Rating Certificate PD-1A, PD-3A, PD-403, or Preference Rating Order P-19-h. Reproduction of any of the foregoing preference rating certificates or orders for the foregoing purposes is hereby permitted.

(i) *Operation of Numerical Master Preference List, and preference ratings.*

(1) All purchase orders of foreign purchasers are hereby assigned a rating of A-1-a for the purposes of this General Preference Order E-1-b. The Numerical Master Preference List. (Exhibit B)¹ attached to this order, herein called "the list" shall determine the sequence of deliveries as between service purchasers as hereinafter set forth, but shall have no effect upon foreign purchasers or other purchasers.

¹ Not filed as part of the original document.

(2) Subject to the provisions of paragraph (c) of this order, as amended, the sequence of deliveries of machine tools among each group of service purchasers within its respective percentage quota shall be determined without regard to preference ratings as follows:

(i) Deliveries to service purchasers who are either on the list or are subcontractors of persons on the list shall be preferred to and shall take precedence over deliveries to service purchasers who are not on the list.

(ii) As between deliveries which have conflicting required delivery dates to be made to two or more service purchasers, both on the list, deliveries shall be made according to their respective urgency standings specified on such list. The highest urgency standing in each group is No. 1.

(iii) As between deliveries which have conflicting required delivery dates to be made to two or more service purchasers, neither of whom is on the list, the sequence of deliveries shall be determined by the respective dates on which the producer receives the photostatic or certified copy of the preference rating certificate.

The delivery for which such photostatic or certified copy was first received takes precedence except that orders received prior to December 25, 1942 shall not be rescheduled according to such rule but shall be delivered in the sequence theretofore scheduled.

(iv) A delivery to a subcontractor who is not specifically named on the list shall take the urgency standing of his prime contractor; the urgency standing of the prime contractor must be endorsed in writing on the subcontractor's preference rating certificate by an officer designated for such purpose by the supply arm or bureau concerned.

(3) The sequence of deliveries of machine tools among foreign and other purchasers within the portion of production allocated to such purchasers shall be determined as follows:

(i) As between deliveries which have conflicting required delivery dates and which bear different preference ratings, delivery shall be made according to the preference ratings of the respective purchasers.

(ii) As between deliveries which have conflicting required delivery dates and which bear the same preference rating, the sequence of deliveries shall be determined by the respective dates on which the producer received the photostatic or certified copy of the preference rating certificate. The delivery for which the preference rating certificate was first received, takes precedence except that orders received prior to December 25, 1942

shall not be rescheduled according to such rule but shall be delivered in the sequence theretofore scheduled.

(j) *Additions to list.* Additions to, withdrawals from, and other changes may be made in the Numerical Master Preference List from time to time by the Director General for Operations or such other official as may be specifically authorized by him. Where it is desired to assign an urgency standing between existing urgency standings, the new urgency standing will consist of a number including a decimal. Such an urgency standing will take a position in the sequence of deliveries as indicated by the following example: Urgency Standing 792.1 will be scheduled after 792 and before 793.

(k) *Revision of scheduled deliveries.* (1) On or before June 1, 1942, with respect to machine tools designated as Group I on Exhibit A and on or before July 1, 1942, with respect to machine tools designated as Group II on Exhibit A, each producer shall revise his schedule of deliveries for each type of tool to conform to the percentage allocations and quotas of the various classes and groups of purchasers and in accordance with the sequences determined by urgency standings and preference ratings, to the extent that he can do so without seriously delaying his production line, and without postponing the date of completion of any particular tool which was 50 per cent or more completed on May 1, 1942, beyond the earliest date when such tool can be 100 per cent completed.

(2) After the date specified in subparagraph (1) of this paragraph, the producer shall make deliveries of tools in accordance with his revised schedules.

(l) *Postponement of new purchase orders.* Unless the Director General for Operations specifically orders otherwise, and notwithstanding any other provisions of this order, no higher preference rating or urgency standing shall operate to postpone or in any way affect any delivery under a purchase order already scheduled where such delivery, in the case of tools designated as Group I on Exhibit A is to be made within 30 days of receipt of such higher preference rating or urgency standing, or in the case of tools designated as Group II on Exhibit A, is to be made within 60 days of receipt of such higher preference rating or urgency standing.

(m) *Specific modifications of schedules.* Notwithstanding any other provisions of this order, the Director General for Operations, or such other official as may be specifically authorized by him, may allocate to another purchaser, or otherwise divert, any machine tool scheduled for production and delivery pursuant to this order. Except as expressly provided in this order, no one other than the Director General for Operations or his duly authorized representative, may give directions respecting sequences of deliveries. No interpretations, instructions, or directions respecting any of the provisions of this order shall be issued without the approval of the Director General for Operations or such other official as may be specifically authorized by him; and no producer shall

accept or give effect to any interpretation, instruction, or direction, which is not issued in accordance with the foregoing provisions.

(n) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(o) *Applicability of Priorities Regulation No. 1.* This order, and all transactions affected thereby, are subject to the provisions of Priorities Regulation No. 1, as amended from time to time, except to the extent that any provision hereof may be inconsistent therewith, in which case the provisions of this order shall govern.

(p) *Reports and other communications.* All reports which may be required to be filed, and all other communications concerning this order, should be addressed to: War Production Board, Washington, D. C. Ref.: E-1-b.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Law 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

Issued this 29th day of December 1942.

ERNEST KANZLER,
Director General for Operations.

INTERPRETATION 1

The term "purchase order," as used in General Preference Order E-1-b, means a firm order for a machine tool which is accompanied either by specifications or by other description of the tool in sufficient detail to enable the producer to place the tool in his production schedules. (Issued May 15, 1942)

INTERPRETATION 4

An urgency standing should not be used in connection with a Preference Rating Certificate PD-1A. General Preference Order E-1-b defines as service purchasers those whose preference rating certificates or whose endorsed purchase orders show that the preference rating was assigned by an original Preference Rating Certificate PD-3, PD-3A, or PD-4, or by Preference Rating Order P-10-h. Hence, the holder of a PD-1A Certificate cannot be a service purchaser as he is excluded from the definition.

Urgency standings govern the sequence of deliveries of machine tools as between service purchasers of the same group within their respective percentage quotas. If a person seeking to procure a machine tool is not a service purchaser he cannot be a member of one of the service purchasers groups, and the urgency standing therefore has no effect upon the delivery of the tool to him. The tool must come out of the 25 percent quota assigned to foreign and other purchasers, and the sequence of its delivery will be determined solely by its required delivery date and its preference rating, in the absence of a specific direction of the Director General for Operations. (Issued August 10, 1942)

PART 3118—CONSUMERS' GOODS INVENTORIES

[Consumers' Goods Inventory Limitation Order L-219]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of consumers' goods for defense, for private account, and for export; and the following order, limiting consumers' goods receipts and providing for inventory reports, is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 3118.1 *Consumers' Goods Inventory Limitation Order L-219—(a) Definitions.* For the purposes of this order:

(1) "Consumers' goods" means goods suitable in form and type for sale to individual ultimate consumers for personal or household use, including but not limited to goods on List B, attached to Order L-219. Consumers' goods do not include producers' goods such as farm implements, goods used in rendering personal services such as shoe repairing, or goods sold for consumption on the vendor's premises such as fountain and restaurant fare. Consumers' goods shall not include any food or beverage for human or animal consumption, or any fuel oil, gasoline, motor oil, grease, or allied petroleum products.

(2) "Mercantile inventory" means the stock of consumers' goods held for sale by a person engaged in marketing such goods, including goods he has purchased for resale, goods he has manufactured for sale, stock consigned to him for sale, and stocks held by him on memorandum for sale.

(i) Mercantile inventories shall not include factory inventories. A "factory inventory" is an inventory of consumers' goods which are stored by the manufacturer of such goods at, or in the immediate vicinity of the place where their manufacture was completed, and which are not being offered for sale to individual ultimate consumers.

(ii) Stocks on consignment or on memorandum for sale are to be included in the inventory of the person actually holding them for sale, and in such case are to be excluded from the inventory of the owner. Stocks on consignment or on memorandum to a person not holding them for sale are to be included in the inventory of the owner.

(iii) Goods in transit may be included in or excluded from inventory: *Provided*, That in all computations, records, reports, and other matters pursuant to this order, they are consistently treated by the merchant in accordance with his prior accounting or income tax return practice. Goods shall cease to be considered in-transit not later than the day after they are delivered to a merchant on his premises, to his warehouse, or to a commercial warehouse for his account.

(iv) Goods are held for sale and are considered as part of "inventory" even though they are not currently offered for

sale, but are stored in a warehouse or elsewhere, with a view to sale at some future time, e. g., seasonal goods during the off season and goods held for speculative purposes. Goods held on the "lay-away" plan pending payment of the purchase price may be included in or excluded from inventory: *Provided*, That in all computations, records, reports and other matters pursuant to this order, they are consistently treated by the merchant in accordance with his prior accounting or income tax practice.

(3) "Merchant" means any person engaged in retailing, wholesaling, jobbing or otherwise marketing consumers' goods, either of his own or another's manufacture, who maintains a mercantile inventory.

(4) "Controlled merchant" means any merchant, not in any of the exempt categories established by paragraph (b), who:

(i) On or after November 30, 1942, had a mercantile inventory of consumers' goods having a cost value of \$50,000 or more at the end of any quarter of any of his federal income tax years, and also

(ii) During the twelve months preceding the end of the same quarter of his federal income tax year had net sales of consumers' goods of \$200,000 or more.

Any merchant who is or becomes a "controlled merchant" within the foregoing definition shall cease to be a "controlled merchant" if at the end of each of any four consecutive quarters thereafter either his mercantile inventory has a cost value of less than \$50,000 or he has failed during the preceding twelve months to make net sales of consumers' goods of \$200,000 or more.

(5) "Net sales" means the amount of a merchant's gross sales of goods in dollars, including sales of goods shipped direct from a vendor to the merchant's customer, less all returns, allowances, rebates, discounts and other proper deductions. In the case of a merchant who is also engaged in manufacturing, his net sales shall not include any sales made, as a manufacturer, out of his factory inventory.

(6) "Cost value" or "cost" of goods received, sold, or in inventory means the value in dollars of such goods computed by any single method of valuation which meets the requirements of generally accepted accounting practice or which is consistently used by the merchant for valuation of inventory for balance sheet and profit and loss statement purposes. Goods held for sale on consignment and on memorandum are to be valued at not less than the amount which the person holding them for sale would be obligated to remit to the owner if all of them were sold. Incoming transportation costs and workroom charges shall also be included in the value of goods on consignment or on memorandum if they are included in the cost value of comparable purchased goods in the inventory of the person holding them for sale. Retail merchants who consistently employ what

is known as the "retail method" of pricing inventories may reduce their inventories to cost by the method prescribed for federal income tax purposes.

(7) "Inventory year" of a merchant means the recurrent twelve calendar month period beginning either December 1, January 1, or February 1, of each year, whichever corresponds with the beginning date of a quarter of his federal income tax year. An inventory year is designated by the number of the calendar year in which most of its months fall. For example, whichever of the inventory years commencing December 1, 1942, January 1, 1943, and February 1, 1943, is selected by a merchant, is his 1943 inventory year within the meaning of this order. Each inventory year shall consist of four "quarterly periods" of three calendar months each, except that any merchant who keeps his books of account on the basis of an annual fiscal period divided into thirteen periods of four weeks each or divided into four thirteen-week quarters may adopt an inventory year of four thirteen-week "quarterly periods," each divided into one five-week and two four-week "months." Any merchant who keeps his accounts on the basis of either of these types of fiscal year may use a date other than December 1, January 1, or February 1, as the first day of his inventory year: *Provided*, That the date selected is as near as possible to the beginning date of a quarter of his federal income tax years.

(8) "Base period" means a period of three inventory years, commencing with the beginning date of the merchant's 1939 inventory year. Ordinarily, this date will be December 1, 1938, January 1, 1939, or February 1, 1939. Any controlled merchant who lacks records for part or all of the base period so computed shall use as his special base period all the complete consecutive quarterly periods between December 1, 1938, and February 1, 1942, for which he has records. If the number of such quarterly periods is less than four, additional periods shall be taken from his 1942 inventory year sufficient to complete a single year. His treatment of inventory and sales data for such special base period shall conform as strictly as possible to the treatment of inventory and sales data for the base period prescribed in Appendix A attached to Order L-219. If a going business has changed owners since the commencement of the period which, but for such change, would have been its base period, and if the current owner possesses or can obtain the necessary data concerning his predecessor's operations, he shall compute the normal inventory of such business as if he had been its owner throughout. A controlled merchant who is unable to establish a base period, including 1942, of at least four consecutive quarterly periods, shall apply to the Director General for Operations for instructions, stating his monthly sales and inventories.

(9) "Normal inventory" means a mercantile inventory at the beginning of a

quarterly period with a cost value no larger in relation to a merchant's projected sales during that quarterly period than he would carry at the beginning of that quarterly period when following his normal base period merchandising practices. In no event shall the normal inventory figure used by a merchant in determining his inventory limit exceed a figure correctly computed from his past inventory and sales experience by the method described and illustrated in Appendix A attached to Order L-219, and employed on Forms PD-689 and PD-690.

(10) "Allowable receipts" during a quarterly period means the cost value of the consumers' goods which a merchant will need during any quarterly period to complete his anticipated sales during that quarterly period and to begin the next succeeding quarterly period with his normal inventory, less the cost value of the mercantile inventory which he has at the beginning of the quarterly period. Except for merchants who elect under paragraph (1) to use the "retail method," the allowable receipts calculated by a merchant shall not exceed the larger of the following:

(i) A figure correctly computed from the merchant's previous experience with respect to sales and cost of goods sold by the method described and illustrated in Appendices A and C attached to Order L-219, and employed on Form PD-690, or

(ii) A figure equal to one-third of the cost of goods sold during the preceding quarterly period.

(11) "Cost of goods sold" means the cost value of goods removed from mercantile inventory by sale, spoilage, shrinkage reserve, consignment to another person or other proper deduction in accordance with generally accepted accounting practice consistently used by the merchant, plus the cost value of goods shipped direct from a vendor to the merchant's customers.

(12) "Receipts of consumers' goods" means the cost value of consumers' goods acquired by a merchant by purchase, consignment, memorandum, or otherwise, in such a way and to such an extent that they became part of the merchant's mercantile inventory, plus the cost value of consumers' goods shipped direct from a vendor to the merchant's customers. Goods manufactured by a merchant are to be included in his receipts when they are transferred to his mercantile inventory.

(13) "Frozen goods" means those consumers' goods in the mercantile inventory of a controlled merchant which he is selling at a substantially less rapid rate than normal, due to governmental regulations which specifically restrict the sale of those consumers' goods, such as typewriters and automobile tires, to pre-

ferred classes of persons based upon special need.

(b) *Exemption of certain types of business.* The provisions of paragraph (d) and paragraph (e) of this order shall not apply to any merchant in any of the following exempt categories.

(1) Any merchant more than fifty per cent of whose aggregate net sales of all kinds of goods during his most recently completed inventory year were sales of goods listed on List A.

(2) Any merchant engaged in retailing, wholesaling, jobbing or otherwise marketing consumers' goods entirely outside the limits of the United States.

(3) Any governmental corporation or agency, including any United States Army or Marine Corps Post Exchange and any United States Navy Ship's Service Department.

(c) *Calculation of inventory limit.*

(1) As used in paragraph (d) and paragraph (e), the "inventory limit" of a controlled merchant at the beginning of any quarterly period of his inventory year shall mean his normal inventory as of the beginning of that quarterly period plus the percentage of such normal inventory to which he is entitled as tolerance, computed by the method described and illustrated in Appendix B attached to Order L-219, and employed on Form PD-690. The percentage of tolerance with respect to mercantile inventories in the Eastern and Central Time Zones shall be 10% at the beginning of the second quarterly period of the 1943 inventory year, and 5% at the beginning of each quarterly period thereafter. The percentage of tolerance with respect to mercantile inventories in the Mountain and Pacific Time Zones shall be 15% at the beginning of the second quarterly period of the 1943 inventory year, and 10% at the beginning of each quarterly period thereafter.

(2) The Director General for Operations may issue specific instructions increasing or decreasing the percentage of tolerance of particular controlled merchants.

(d) *Restrictions on receipts of consumers' goods.* (1) No controlled merchant whose mercantile inventory is greater than his inventory limit at the beginning of any quarterly period, other than the first quarterly period of the 1943 inventory year, shall have receipts of consumers' goods during the quarterly period in excess of his allowable receipts for such quarterly period.

(2) No controlled merchant whose mercantile inventory is greater than his inventory limit at the beginning of any quarterly period, other than the first quarterly period of the 1943 inventory year, shall receive more than one-third of his allowable receipts for such quarterly period during the first month, or

more than two-thirds during the first two months, of such quarterly period.

(3) The Director General for Operations may issue specific instructions increasing or decreasing the allowable receipts of particular controlled merchants.

(e) *Special reports.* Any controlled merchant having a mercantile inventory which is greater than his inventory limit at the beginning of any quarterly period, except the first quarterly period of his 1943 inventory year, shall fill out in duplicate, and mail to the War Production Board one copy of each of the following reports, retaining the other copy of each in his possession.

(1) Form PD-690, on or before the twenty-fifth day of the first month of such quarterly period, together with Form PD-689. (Form PD-689 is to be submitted once only, at the time of the first filing of Form PD-690.)

(2) Form PD-713, on or before the twenty-fifth day of the second month of such quarterly period.

(3) Form PD-713, on or before the twenty-fifth day of the third month of such quarterly period.

(4) Form PD-690, on or before the twenty-fifth day of the first month of the following quarterly period.

(f) *Corporate combinations and similar enterprises.*—(1) *Consolidated inventories and reports.* Except as otherwise provided in paragraphs (g) and (h), every person affected by this order shall, when computing the quantity of his sales, his mercantile inventories, his receipts, and other matters pursuant to this order, include the sales, mercantile inventories, receipts and other matters of all stores, branches, divisions and sections of his enterprise and of any other enterprise under common ownership or control with his enterprise. Moreover, the reports relating to such sales, inventories and other matters shall be consolidated and shall include the sales, inventories and other matters of all branches, divisions, or sections of all enterprises under common ownership or control without regard to corporate or other distinctions between such enterprises. Concessions and leased departments shall be treated as enterprises separate from the business of the merchant whose premises they occupy, unless under common ownership or control with such business.

(2) *Intra-company and inter-company sales.* In all computations and reports pursuant to this order, transactions within the enterprise of a single person or between stores, branches, divisions or sections of enterprises subject to common ownership or control shall not be counted as sales or as receipts of goods, even though designated on the books of such enterprise or enterprises as sales or receipts, with the following single exception: If one or more of the establish-

ments under common ownership or control engages in manufacturing, then transfer of consumers' goods from factory inventory to mercantile inventory shall constitute a receipt of such goods.

(g) *Separate accounting for company stores.* (1) If any person, as an incident of his principal business, carries on a business enterprise consisting of one or more company stores, commissaries, industrial stores, or other similar type of business enterprise marketing consumer goods chiefly to the employees of such person and their families, then that person shall determine whether such incidental enterprise is a controlled merchant as defined in paragraph (a) (4) of this order and not exempt under paragraph (b) when separately considered.

(2) If such incidental enterprise is, in itself, a controlled merchant, then, even though the principal business of that person may consist of sales of goods on List A, such person shall keep the records, report the inventories, and restrict the receipts of goods of such incidental enterprise as a separate entity. Such person shall exclude the sales, inventories, and receipts of goods of such incidental enterprise from computations and other matters respecting his principal business.

(h) *Separate accounting for ownership groups.* If a controlled merchant consists of a number of establishments, each of which would be a controlled merchant if considered separately, which are substantially independent with respect to merchandising, buying, warehousing, selling, advertising, management, and accounting, and in the operation of which the controlled merchant does not practice centralized buying for, centralized storage for, or interchange of stocks among the constituent establishments, such controlled merchant may elect by written notice to the War Production Board, mailed before February 1, 1943, to keep the records report the inventories, and restrict the receipts of goods of each such constituent establishment as a separate entity.

(i) *Segregation of consumers' goods from other goods.* Any merchant who is engaged in marketing both consumers' goods and other goods may include such other goods with consumers' goods in calculating inventories, sales, receipts of goods, and all other matters under this order if such other goods are consistently included and if their exclusion would be impracticable. The exclusion of such goods from consumers' goods may be considered impracticable only when such exclusion would require the compilation of data respecting the base period which that merchant does not already have available and which could be compiled, if at all, only by re-examining his original records of sales, purchases and inventories during the base period.

(j) *Consistency in accounting.* In the valuation of inventories, in the computation of net sales and costs of goods sold, and in all other matters of accounting under this order, unless otherwise

specifically authorized by the Director General for Operations, a merchant must use those accounting methods and figures which are in accordance with his books of account or his income tax returns, which meet the requirements of generally accepted accounting practice for the particular purpose, and which he has consistently employed since the beginning of his base period. If, since that date, there has been a material change or inconsistency in his accounting practice affecting valuation of inventories, computation of his net sales, cost of goods sold, or other matters of accounting under this order, or if his customary accounting methods do not meet the requirements of accepted accounting practice, he shall apply by letter to the Director General for Operations for specific instructions concerning the adjustments, if any, to be made, stating in such letter the nature of the change or inconsistency, or the variance from accepted practice.

(k) *Inter-relation with Suppliers' Inventory Limitation Order L-63.* Nothing in this order shall be construed to relieve any person of the duty of complying with § 1046.1, Suppliers' Inventory Limitation Order L-63. Any controlled merchants who market supplies, as defined in Order L-63, and who are not exempt from this order by virtue of paragraph (b) (1), shall not only comply with any restrictions of Order L-63 applicable to their operations but shall also comply with the provisions of this order without distinction between those consumers' goods which are supplies and other consumers' goods.

(l) *Optional use of the "retail method."* Any retail merchant who employed during his base period what is known as the "retail method" of pricing inventories may elect to value his mercantile inventory and to compute his allowable receipts at retail, rather than at retail reduced to "cost" or "cost value," on the following conditions:

(1) He shall employ a percentage of tolerance two per cent lower than he would otherwise be entitled to use under the provisions of paragraph (c) (1).

(2) He shall consistently value his goods at retail wherever the provisions of this order specify the use of "cost value" or "cost," except for the purpose of determining whether he is a controlled merchant under paragraph (a) (4).

(3) His allowable receipts at retail shall not exceed the larger of the following:

(i) A figure correctly computed from the merchant's previous experience with respect to sales and markdowns by the method described and illustrated in Appendix D attached to Order L-219, and employed on Form PD-690, or

(ii) A figure equal to one-third of his net sales during the preceding quarterly period.

(4) His markdowns at retail used in computing his allowable receipts at retail shall not be a greater percentage of his projected sales than his markdown per-

centage in the corresponding quarterly period of the preceding inventory year.

(m) *Deduction of surplus inventory of "frozen goods".* Except for the purpose of determining whether he is a controlled merchant, a controlled merchant may deduct from the cost value of his mercantile inventory on hand at the beginning of any current quarterly period an amount in dollars equal to:

(1) The cost value on that date of his mercantile inventory of any kind of "frozen goods" which he has had in his mercantile inventory more than four months, minus

(2) The cost value of the "frozen goods" of that kind sold by him during the immediately preceding quarterly period.

(n) *Officers' uniforms.* Except for the purpose of determining whether he is a controlled merchant, any controlled merchant authorized to accept delivery of officers' uniforms produced under Section 1243.1, Preference Rating Order P-131, may exclude his current receipts, sales, and inventories of such uniforms in any computations, reports and other matters under this order requiring the use of current data, provided he does so consistently.

(o) *Miscellaneous reports.* Merchants shall execute and file with the War Production Board such reports and answers to questionnaires as the Director General for Operations may from time to time request, including reports concerning the sales and inventories of subsidiaries, branches or sales units, or of separate retailing or wholesaling divisions, or of particular departments or lines of merchandise.

(p) *Records.* (1) Every merchant shall preserve those records concerning his operations necessary to determine whether he is a controlled merchant.

(2) Every controlled merchant shall preserve his records concerning sales and inventories during the base period until further notice. Complete and accurate records kept on Form PD-639 will satisfy this requirement.

(3) Every controlled merchant shall prepare and preserve for a period of at least two years accurate and complete records concerning his sales, inventories, cost of goods sold, and receipts of goods in such form that the extent of his compliance with this order can readily be ascertained. Complete and accurate records kept on Forms PD-639, PD-690 and such other forms as are issued from time to time will satisfy this requirement.

(q) *Miscellaneous provisions.*—(1) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(2) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(3) *Appeals.* Any person subject to any requirement of this order, who feels

that compliance therewith would work an exceptional or unreasonable hardship upon him, may appeal by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(4) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control or allocation and may be deprived of priorities assistance.

(5) *Communications to the War Production Board.* All reports, when ordered to be filed, and all communications concerning this order shall, unless otherwise directed, be sent to the War Production Board, Washington, D. C. Ref.: L-219.

APPENDIX A

COMPUTATION OF A NORMAL INVENTORY

I. Computation of the normal quarterly inventory-sales ratio, using the second quarterly period ratio as an example.

A. Add the mercantile inventories for the quarterly periods of the base period years corresponding to the quarterly period for which the normal inventory is being computed.

Example

1939 Beginning 2nd quarterly period inventory	\$-----
1940 Beginning 2nd quarterly period inventory	-----
1941 Beginning 2nd quarterly period inventory	-----
Total A	\$-----

B. Add the net sales for the quarterly periods of the base period years corresponding to the quarterly period for which the normal inventory is being computed.

Example

1939 sales 2nd quarterly period	\$-----
1940 sales 2nd quarterly period	-----
1941 sales 2nd quarterly period	-----
Total B	\$-----

C. Divide Total A by Total B, computing to three decimal places.

$\frac{\text{Total A}}{\text{Total B}}$ = normal inventory-sales ratio for all second quarterly periods.

II. Computation of projected sales, using the second quarterly period of 1943 as an example.

A. In computing the projected sales for a quarterly period, divide the net sales during the second preceding quarterly period by the net sales during the quarterly period of the previous year corresponding to the second preceding quarterly period, computing to three decimal places.

Example

Sales 4th quarterly period 1942
Sales 4th quarterly period 1941 = Sales ratio for 2nd quarterly period 1943.

B. Then multiply the sales ratio for the quarterly period by the net sales during the corresponding quarterly period of the preceding year.

Example

Sales ratio 2nd. qt. '43 \times sales 2nd qt. '42 = Projected sales 2nd qt. '43.

III. Computation of the normal inventory, using the second quarterly period of 1943 as an example.

Multiply the projected sales during the quarterly period by the normal inventory-sales ratio for that quarterly period.

Example: Projected sales 2nd qt. '43 \times normal inventory-sales ratio for all 2nd qts. = normal inventory beginning 2nd qt. '43.

APPENDIX B

COMPUTATION OF INVENTORY LIMIT

I. Computation of the inventory limit using as an example the second quarterly period of 1943 of a merchant in the Eastern Time Zone operating on the cost method.

A. Compute the tolerance by multiplying the normal inventory for the beginning of the quarterly period by the appropriate percentage of tolerance.

Example

Normal inventory beginning 2nd qt. '43 \times .10 = Tolerance beginning 2nd qt. '43.
B. Add the tolerance thus secured to the normal inventory.

Example

Tolerance beginning 2nd quarterly period '43	\$-----
Normal Inventory beginning 2nd quarterly period '43	-----
Inventory Limit	\$-----

APPENDIX C

COMPUTATION OF ALLOWABLE RECEIPTS AT COST VALUE ON THE BASIS OF PROJECTED SALES

I. Computation of the cost of projected sales for a quarterly period, using the second quarterly period of 1943 as an example.

A. Divide the cost of goods sold during the corresponding quarterly period of the preceding year by the net sales during the corresponding quarterly period of the preceding year.

Example

Cost of goods sold 2nd qt. '42 \div Net sales 2nd qt. '42 = Cost ratio for 2nd qt. '43.

B. If such data are not available, use the cost of goods sold and net sales on the most recent federal income tax return.

Example

Cost of goods sold during taxable year 1942—Net sales during taxable year 1942=
Cost ratio for any qt. of '43.

C. Multiply the projected sales for the quarterly period computed in accordance with Appendix A, by the cost ratio for the quarterly period.

Example

Cost ratio×projected sales 2nd qt. '43=Cost
of projected sales for 2nd qt. '43

II. Computation of allowable receipts for a quarterly period, using the second quarterly period of 1943 as an example.

A. Add the cost of projected sales for the quarterly period to the cost value of a normal inventory at the beginning of the next quarterly period.

Example

Cost of Projected sales 2nd qt. '43----- \$-----
Normal inventory beginning 3rd qt. '43-----

Total A-----

B. Subtract from the sum thus secured the mercantile inventory on hand at the beginning of the current quarter.

Total A----- \$-----
(Minus) Mercantile inventory beginning 2nd qt. '43-----

Allowable Receipts during 2nd qt. '43----- \$-----

APPENDIX D

COMPUTATION OF ALLOWABLE RECEIPTS AT RETAIL
VALUE USING PROJECTED SALES

I. Computation of allowable receipts for a quarterly period, using the second quarterly period of 1943 as an example.

A. Add the projected sales and the projected markdowns for the quarterly period to a normal inventory at retail value at the beginning of the next quarterly period.

Example

Projected Sales 2nd qt. '43----- \$-----
Projected Markdowns at Retail 2nd
qt. '43-----
Normal Inventory at Retail beginning
3rd qt. '43-----

Total A----- \$-----

B. Subtract from the sum thus secured the mercantile inventory, at retail, on hand at the beginning of the quarterly period.

Example

Total A----- \$-----
(Minus) Mercantile inventory at retail
value beginning 2nd qt. '43-----

Allowable Receipts at retail during 2nd
qt. '43----- \$-----

The maximum prices established above for 3 ounce and 8 ounce bottles shall be subject to a discount of 5 percent for service allowance and a discount of 2 percent for prompt payment. Maximum prices established herein for 1 gallon, 5 gallon, 30 gallon and 50 gallon sizes shall be subject to a discount of 20 percent for wholesaler's commission and 2 percent for prompt payment.

(b) Sellers at wholesale shall determine their maximum selling prices for "Venoka" by adding to their net cost for each size a maximum markup of 25 percent of this net cost. The unit on which a wholesaler shall calculate his maximum price shall be one dozen of the 3 ounce and 8 ounce bottles, and one only of the 1 gallon, 5 gallon, 30 gallon and 50 gallon containers. Where a maximum price determined by the provisions of this paragraph is a fractional cent price and the fraction of a cent is less than one-half cent, the price shall be lowered to the next lower cent. If the fraction is one-half cent or larger the wholesaler is permitted to increase his maximum price to the next higher cent.

Net cost for a wholesaler as mentioned in this paragraph shall be his invoice price for "Venoka" delivered in a customary quantity for this type of item by the customary mode of transportation to his customary receiving point, less all discounts allowed him, except the discount for prompt payment. No drayage, loading or unloading shall be included in the net cost.

(c) Sellers at retail shall determine their maximum delivered selling prices for "Venoka" per container or bottle by adding to their net cost per dozen for each size, a maximum profit margin of 40 percent of this net cost and dividing the figure so obtained by twelve. Where a maximum price determined by the provisions of this paragraph is a fractional cent price and the fraction of a cent is less than one-half cent, the price shall be lowered to the next lower cent. (d) No seller at wholesale shall change his customary allowances, discounts and price differentials applying to comparable items of flavorings, or flavoring extracts in making sales of "Venoka" unless such change in these customary allowances, discounts and price differentials results in lower selling prices.

(e) On and after December 29, 1942, Corsan Products, Inc. shall supply a written notification to each wholesaler before or at the time of first delivery of "Venoka" to such wholesaler, and for a period of three months thereafter shall include with each shipping unit of "Venoka" a written notification to retailers. 5 gallon demi-johns, per gallon	2.76

subject to the following discounts:

For 3 ounce and 8 ounce bottles—5 percent for service allowance and 2 percent for prompt payment;

For 1 gallon, 5 gallon, 30 gallon and 50 gallon sizes—20 percent for wholesaler's commission and 2 percent for prompt payment.

Wholesalers are authorized to establish maximum delivered selling prices by adding to their net cost of these items 25 percent of such net cost. The unit on which a wholesaler shall calculate his maximum price shall be one dozen of the 3 ounce and 8 ounce bottles, and one only of the 1 gallon, 5 gallon, 30 gallon and 50 gallon containers. Net cost is invoice cost at the customary receiving point, less all discounts, other than for prompt payment, and excluding charges for local hauling. Retailers shall establish maximum delivered selling prices per container or bottle by adding to their net cost per dozen for each size 40 percent of such net cost and dividing by twelve. Each individual selling price determined by any seller shall be figured to the nearest cent (raise one-half cent fractions to the next even cent). A copy of a notification to retailers is included in or on every shipping unit of this item. If the initial sale of this item to any retailer is a split case sale, wholesalers are required to provide such retailer with a copy of the retail notification so enclosed. OPA requires that you keep this notice for examination.

PART 1367—FERTILIZERS

[Revised MPR 135]

MIXED FERTILIZER, SUPERPHOSPHATE AND POTASH

The title, preamble and section numbers of Maximum Price Regulation 135—Mixed Fertilizer, Superphosphate and Potash,³ are amended, and renumbered to read as set forth herein.

In the judgment of the Price Administrator, it is necessary and proper to establish maximum prices for sales of mixed fertilizer, superphosphate and potash which differ, for certain grades and in certain areas of the country, from those heretofore established by applicable maximum price regulations. All of the grades of mixed fertilizer permitted to be manufactured under War Production Board Conservation Order M-231 as amended are covered by this single maximum price regulation.

The Price Administrator has ascertained and given due consideration to the prices of mixed fertilizer, superphosphate and potash prevailing between October 1 and 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. A statement of the considerations involved in the issuance of this regulation has been prepared, issued simultaneously herewith, and has been filed with the Division of the Federal Register.* Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as

amended, and Executive Order No. 9250, and in accordance with Revised Procedural Regulation No. 1,² issued by the Office of Price Administration, Revised Maximum Price Regulation No. 135 is hereby issued.

AUTHORITY: §§ 1367.31 to 1367.46, inclusive, issued under Pub. Laws 421 and 729, 77th Cong.; E.O. 9250, 7 F.R. 7871.

§ 1367.31 *Sales of mixed fertilizer, superphosphate and potash at higher than maximum prices prohibited.* On and after January 4, 1943, regardless of any contract, agreement, lease, or other obligation, no person shall sell or deliver to a consumer or a dealer, and no person in the course of trade or business shall buy or receive, mixed fertilizer, superphosphate or potash at prices higher than the maximum prices established herein, and no person shall agree, offer, solicit or attempt to make such a sale, purchase or delivery.

§ 1367.32 *To what transactions, products and persons this regulation applies—*
(a) *What transactions are covered.* This regulation unlike the previous fertilizer regulation (Maximum Price Regulation 135) is not limited to sales in quantities of 250 pounds or more to consumers.

It covers all sales by manufacturers to dealers and consumers, and by dealers to consumers.

(b) *What products are covered.* This Revised Maximum Price Regulation No. 135 covers all mixed fertilizer, superphosphate and potash of whatsoever kinds and grades.

(c) *What persons are covered.* Manufacturers and their agents and dealers making the sales covered by this regulation are subject to it.

§ 1367.33 *Manufacturers' maximum prices.* (a) A manufacturer's maximum prices shall be the prices set forth in the written or printed price schedule or list last issued by the manufacturer, prior to February 21, 1942, and effective for any portion of the period from February 16

to 20, 1942 inclusive, except for any manufacturer making a delivery to a place in Florida east of the Apalachicola River, whose maximum price for such delivery shall be the price set forth in his written or printed price schedule or list effective on July 31, 1941, irrespective of whether or not it was still effective during the period February 16 to 20, 1942, and as those prices may be increased for the places of delivery and in the manner and amounts set forth in Appendix A incorporated herein as § 1367.44, for a sale (1) to a consumer or dealer in the same locality, (2) of the same quantity, grade and kind of mixed fertilizer, superphosphate or potash, (3) delivered in the same type of container or bag (except as hereinafter provided), (4) under the same terms of payment (time, cash, discounts, etc.), and (5) by the same means and under the same conditions of delivery.

(b) If the manufacturer cannot establish his maximum price under paragraph (a), or under Appendix B incorporated herein as § 1367.45, then his maximum price shall be determined as follows: He shall submit to the Office of Price Administration in Washington, D. C., a proposed maximum price, showing the calculations by which the proposed maximum price was determined by the manufacturer. Such proposed maximum price must be in line with the manufacturer's level of maximum prices established under paragraph (a), for a comparable quantity, grade and kind of mixed fertilizer, superphosphate or potash sold by the manufacturer to a consumer or dealer in the same locality under the same conditions in the same or comparable type of containers or bags; or in the event the manufacturer had established no prices under paragraph (a) then such proposed maximum price shall not be higher than the general level of maximum prices established under paragraph (a), and the proposed maximum price to consumers shall provide no greater margin between dealer and consumer prices than is provided in the manufacturer's own consumers' price schedule or, in the absence of such schedule of his own, no greater margin than is provided in such a schedule of his most closely competitive seller of the same class. If within 10 days of the registered mailing of such proposed maximum price it has not been disapproved by the Office of Price Administration, the manufacturer may sell, offer for sale, and deliver such mixed fertilizer, superphosphate or potash at the proposed maximum price. Notwithstanding that the Office of Price Administration does not disapprove such price within such 10 day period, it may at a later time disapprove such price or require a modification thereof on such terms and conditions as it deems advisable. All deliveries to a consumer or dealer, or shipments received by a carrier other than a carrier owned or controlled by the person making the sale (including a dealer, agent or other person) after the expiration of such 10 day period but prior to such disapproval or requirement of

modification, shall not be affected by such later action on the part of the Office of Price Administration disapproving or modifying such maximum price.

§ 1367.34 *Dealers' maximum prices.* A dealer's maximum price to a consumer shall be determined as follows: (a) To the dealer's net delivered cost established herein there may be added the "suggested" or "recommended" margin specified for that dealer's sales area in the price schedule or list last issued by the manufacturer prior to February 21, 1942, and effective for any portion of the period from February 16 to February 20, 1942 inclusive, or (b) if the manufacturer's price schedule in effect during such period for the dealer's sales area provided "suggested" consumer prices or prices at which the manufacturer might make sales to consumers, then those "suggested" or effective consumer prices as those prices may be increased for the places of delivery and in the manner and amounts set forth in Appendix A incorporated herein as § 1367.44, shall be the dealer's maximum consumer prices; or (c) if the manufacturer, during such period, had no consumer prices in effect and provided no "suggested" or "recommended" consumer prices or dealer margins for the dealer's sales area, then the dealer's maximum prices to consumers shall be calculated as specified in Appendix C incorporated herein as § 1367.46.

§ 1367.35 *Terms of payment and conditions of delivery.* Terms of payment or conditions of delivery to a consumer or to a dealer shall not be more onerous than those in effect and applicable to such consumer or dealer for the period from February 16 to February 20, 1942 inclusive, except that terms of payment on sales made between July 1 and December 1 of any calendar year hereafter shall not be more onerous than those in effect and applicable to such consumer or dealer for the period from October 1 to October 15, 1941, inclusive.

§ 1367.36 *Federal, state and municipal taxes.* Any tax upon, or incident to, the sale, delivery, processing, or use of the mixed fertilizers, superphosphate and potash, imposed by any statute of the United States or statute or ordinance of any state or subdivision thereof, shall be treated as follows in determining the seller's maximum price for such commodity and in preparing the records of such seller with respect thereto:

(a) *As to a tax in effect from February 16 to February 20, 1942 inclusive.* If the seller paid such tax, or if the tax was paid by any prior vendor, irrespective of whether the amount thereof was separately stated and collected from the seller, but the seller did not customarily state and collect separately from the purchase price from February 16 to February 20, 1942 inclusive, the amount of the tax paid by him or tax reimbursement collected from him by his vendor, the seller may not collect such amount in addition to the maximum price, and

²Copies may be obtained from the Office of Price Administration.

²7 F.R. 8961.

in such case shall be regarded as having included such amount in determining the maximum price under this Revised Maximum Price Regulation No. 135.

In all other cases if, at the time the seller determined his maximum price, the statute or ordinance imposing such tax did not prohibit the seller from stating and collecting the tax separately from the purchase price, and the seller did state it separately, the seller may collect, in addition to the maximum price, the amount of the tax actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased, and in such case the seller shall not include such amount in determining the maximum price under this Revised Maximum Price Regulation No. 135.

(b) *As to a tax or increase in a tax which becomes effective after February 20, 1942.* If the statute or ordinance imposing such tax or increase does not prohibit the seller from stating and collecting the tax or increase separately from the purchase price, and the seller does separately state it, the seller may collect, in addition to the maximum price, the amount of the tax or increase actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased; except that the tax on transportation imposed by § 620 of the Revenue Act of 1942 shall, for the purposes of determining the applicable maximum price of any commodity subject to this regulation, be treated as though it were an increase of 3% in the amount charged by any person transporting the commodity for hire, and it shall not be treated under any provision of this regulation or any interpretation thereof, as a tax for which a charge may be made in addition to the maximum price.

§ 1367.37 *Prohibited practices—General.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars and cents price is as much a violation of this Revised Maximum Price Regulation No. 135 as an outright over-ceiling price. This applies to changes in credit practices and cash discounts, and to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings and the like.

§ 1367.38 *Records and reports.* (a) Every person (including a dealer, agent or other person) making a sale of mixed fertilizer, superphosphate or potash, in quantities of 250 pounds or more, to a consumer or dealer, after January 4, 1943 shall keep for inspection by the Office of Price Administration for so long as the

Emergency Price Control Act of 1942 as amended is in effect, complete and accurate records of each sale, showing the date thereof; and name and address of the buyer, of the person (including an agent) making the sale, and of the manufacturer of the mixed fertilizer, superphosphate or potash; the quantity, grade and kind of the mixed fertilizer, superphosphate or potash sold; the bags or containers in which delivered; the price charged or received therefor; the terms of payment (time, cash, discounts, etc.); and the method and conditions of delivery.

(b) (1) Not later than January 15, 1943, every manufacturer of mixed fertilizer, superphosphate or potash, who is engaged in the business of selling the same to consumers and dealers, whether by or through any agent or other person, except those manufacturers who have heretofore done so, shall file with the Office of Price Administration in Washington, D. C., one copy of each and every written or printed price schedule, whether temporary or permanent, issued by him in connection with the sale thereof to consumers and dealers from and after July 1, 1941, together with all written or printed amendments and supplements to any such schedules; but if a manufacturer has not heretofore issued a written or printed price schedule, he shall file with the Office of Price Administration in Washington, D. C., a list of maximum prices charged by seasons from and after October 1, 1941, for the grades and kinds of mixed fertilizer, superphosphate or potash sold to consumers and dealers showing types of bags, terms of payment and conditions of delivery; and each manufacturer shall continue, until further notice, to file with the Office of Price Administration in Washington, D. C., one copy of any and all subsequent price schedules and supplements and amendments, at least ten (10) days prior to the proposed effective date thereof. Each such price schedule, supplement or amendment hereafter filed with the Office of Price Administration shall be accompanied by a statement of all changes made wherein that price schedule, supplement or amendment differs from the price schedule in effect at the time of filing.

(2) In accordance with request addressed to the Office of Price Administration, Washington, D. C., copies of this Revised Maximum Price Regulation No. 135 will be furnished each manufacturer for distribution to his agents and dealers.

(3) Each dealer or agent shall post at his place of business a list of his consumers' maximum prices.

(4) Each manufacturer selling direct to consumers shall post at his office, plant and warehouse his consumer's price list in effect for the area served by each such office, plant, or warehouse.

(c) Persons affected by this Revised Maximum Price Regulation No. 135, shall submit such other information to the Office of Price Administration as it may, from time to time, require, in order to effectuate the purposes of the Emergency Price Control Act of 1942 as amended.

§ 1367.39 *Enforcement and licensing.*

(a) Persons violating any provision of this Revised Maximum Price Regulation No. 135 are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for revocation of licenses provided for by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250.

(b) Persons who have evidence of any violation of this Regulation or of any other regulation or order issued by the Office of Price Administration are urged to communicate with the nearest field, state, or regional office of the Office of Price Administration or its principal office in Washington, D. C.

(c) The registration and licensing provisions of §§ 1499.15 and 1499.16 of the General Maximum Price Regulation are applicable to every person subject to this Revised Maximum Price Regulation No. 135 selling at retail any mixed fertilizer, superphosphate or potash covered by this Revised Maximum Price Regulation No. 135. When used in this section, the term "selling at retail" has the definition given to it by § 1499.20 (c) of the General Maximum Price Regulation. Said registration and licensing provisions became effective as to persons selling at retail on May 18, 1942.

§ 1367.40 *Petitions for amendment—*

(a) *Amendments.* Persons seeking any modification of this Revised Maximum Price Regulation No. 135 or an adjustment or exception not provided for herein may file petitions for amendment in accordance with the provisions of Revised Procedural Regulation No. 1, issued by the Office of Price Administration.

(b) *Government contracts.* (1) The term "government contracts" is here used to include any contract with the United States or any of its agencies, or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States." It also includes any subcontract under this kind of contract.

(2) Any person who has made or intends to make a "government contract" and who thinks that a maximum price in this Revised Maximum Price Regulation 135 is impeding or threatens to impede production of mixed fertilizer, superphosphate or potash which is essential to the war program and which is or will be the subject of the contract, may file

an application for adjustment in accordance with Procedural Regulation No. 6.⁴ A copy can be had at any office of the Office of Price Administration.

(3) As soon as the application is filed, deliveries may be made at the requested price, subject to refund if the requested price is disapproved or lowered. The seller must tell the buyer that the delivery is made subject to this refund.

§ 1367.41 *Relation to other regulations*—(a) *General Maximum Price Regulation*. Any sale or delivery covered by this Revised Maximum Price Regulation No. 135 is not subject to the General Maximum Price Regulation.⁵

(b) *Maximum Export Price Regulation*. The maximum price for export sales of mixed fertilizer, superphosphate or potash is governed by the Revised Maximum Export Price Regulation.⁶

(b) If mixed fertilizer, superphosphate or potash has been received before January 4, 1943 by a carrier, other than one owned or controlled by the seller, for shipment to a buyer, that shipment remains subject to the terms of the earlier version of this regulation (Maximum Price Regulation No. 135 as amended).

The term "General Communication" is used only as a designation for non-Government frequencies which have not been assigned to any specific service. Section 305 (a) of the Communications Act of 1934, as amended, states as follows:

"Radio stations belonging to and operated by the United States shall not be subject to the provisions of sections 301 and 303 of this Act. All such Government stations shall use such frequencies as shall be assigned to each or to each class by the President. All such stations, except stations on board naval and other Government vessels while at sea or beyond the limits of the continental United States, when transmitting any radio communication or signal other than a communication or signal relating to Government business, shall conform to such rules and regulations designed to prevent interference with other radio stations and the rights of others as the Commission may prescribe."

For more detailed information regarding restrictions on the use of non-government frequencies consult the part of the Rules and Regulations of this Commission covering the service or class of station to which the frequency is allocated.

TITLE 49—TRANSPORTATION AND RAILROADS

Chapter II—Office of Defense Transportation

[General Order ODT 11, Amendment 1]

PART 501—CONSERVATION OF MOTOR EQUIPMENT

SUBPART H—INTERCITY COMMON CARRIERS OF PASSENGERS BY BUS

Pursuant to Executive Orders Nos. 8989 and 9156, General Order ODT 11¹ is hereby amended by adding paragraphs (i), (j) and (k) to § 501.45 and by adding paragraph (c) to § 501.46, and by adding paragraph (e) to § 501.47, the amendments to read as follows:

§ 501.45 Definitions. * * *

(i) The term "rated load carrying ability" as applied to a bus means the weight which the tires mounted on the load bearing wheels of such bus are capable of carrying as determined in the manner set forth in Appendix No. 1 attached hereto.

(j) The terms "load to capacity" or "loaded to capacity" as applied to a bus mean either (1) the aggregate weight of the passengers, baggage and express, who or which may be transported in said bus, determined by deducting the weight of said bus from one hundred twenty (120) per cent of its rated load carrying ability, or (2) the maximum number of passengers and amount of baggage or express, who or which may be safely and efficiently transported within a bus when their aggregate weight does not load a bus to capacity as determined by (1) above.

(k) The term "gross weight" means the aggregate weight of a bus and its passengers, baggage and express.

§ 501.46 Elimination of waste; load-carrying requirements. * * *

(c) Load to capacity any bus being operated in intercity service whenever passengers, baggage or express are available for transportation, except a bus

which has become disabled en route and the operation thereof empty or partially laden is required to reach the nearest point at which such carrier maintains, provides, or can obtain repair services: *Provided*, That nothing in this subpart contained shall be construed to require the loading of a bus to such an extent that the gross weight of the bus will exceed the actual safe capacity of any bridge or other structure en route, as determined by State or local authorities, or will exceed the maximum gross weight limitations prescribed by the applicable State law, proclamation, or regulation, Federal statute, or Executive Order, whichever is currently controlling, but such bus shall be loaded as nearly to the extent required by this subpart as may be consistent with such applicable limitations.

§ 501.47 Operating requirements. * * *

(e) Operate a bus in intercity service, the gross weight of which exceeds its gross weight when loaded to capacity as provided by § 501.46 (c).

This amendment shall become effective January 1, 1943. (E.O. 8989, 9156; 6 F.R. 6725; 7 F.R. 3349.)

Issued at Washington, D. C., this 29th day of December 1942.

JOSEPH B. EASTMAN,
Director of Defense Transportation.

APPENDIX No. 1

Under the terms of § 501.45 (i) of this subpart, the rated load carrying ability of the tires mounted on the running wheels of a bus shall be determined by multiplying the number of tires mounted on the running wheels of such bus, of the size and description actually used, by the number of pounds appearing opposite the description of such tires in this Appendix.

Example: A bus uses 10 running tires, size 9.00-20, ten ply. The rated load carrying ability of each such tire, in pounds per tire, as shown in this Appendix, is 3450. Multiply 10 (number of tires) by 3450 (rated load carrying ability of each tire). The result is 34,500 pounds, which is the "rated load carrying ability" of the bus as defined in § 501.45 (i).
